Description:

The places listed above were for general storage. Their shape and structure are undefined. See also 3.13.4 Armory, arsenal<REALIA:3.13.4> and 3.14.1.4 Treasury, strongroom<REALIA:3.14.1.4>.

Translation:

In most of the references listed above it is stated what was being stored. Where the commodity being stored is named, languages may have a special word for the particular place where such a commodity is stored; for example, in 1CH 27:27GNT has “Wine cellars” for the Hebrew word ’otsar. However, in the following verse, where the same word is used together with “oil,” GNT has “Olive oil storage,” because English has no special word for a place to store olive oil.

Description and usage:

Grain-store at Megiddo (© Ian Scott, CC BY-SA 2.0, via Wikimedia Commons)The grain-store or silo was a small structure for storing agricultural produce. It normally was made of stone.

Translation:

In a number of languages an important distinction is made between buildings used to store farm produce and those that are warehouses for other types of material. This structure was actually not a “building” in the sense that it was constructed like a house. The English word “barn” conveys the idea of a large, multi-purpose structure. Something like “grain-store,” “granary,” or “grain bin” will be preferable.

Most of the references to the Hebrew word misknoth (except 2CH 32:28) appear with the word for “city.” The following advice comes from of A Handbook on Exodus (page 22) at EXO 1:11: “The **store-cities** were special centers built as warehouses for storing grain and other supplies for the government. If such centers are unknown in the receptor culture, it is possible to translate this word as ‘cities in which to store supplies,’ or ‘cities ... to serve as supply centers,’ as in TEV [that is, GNT]. In cultures where the only large human settlements are villages surrounded by fences, translators will need other more descriptive ways to translate **store-cities**; for example, ‘large villages with high walls [or, fences] around them, where supplies are stored’ or ‘large places with high fences around them, where they store grain and other things.’ ”
